Tooth Booth Reviews

"I recently visited Park Family and Cosmetic Dentistry, and I have to say the service was absolutely amazing! The staff was incredibly friendly and made me feel right at home from the moment I walked in. The dentist was very professional and took the time to explain everything in detail, which made me feel comfortable and well-informed about my treatment. The office was clean and modern, and they used the latest technology, which really impressed me. Overall, it was a fantastic experience, and I highly recommend them to anyone looking for top-notch dental care!" - Keyshia

"Five star service, professionalism, intelligence, competence and compassion. From the moment you walk into the office it comes alive to make you feel comfortable assured that your experience will be a first class experience. Everyone was highly educated trained and ready to go. I would highly recommend and encourage anyone to consider using Park Family and Cosmetic Dentistry. Exceptional people that care greatly." - Paul

Since becoming a dentist in 2009, Dr. William Campbell has cherished the opportunity to provide tangible, often immediate benefit to the lives of his patients, whether by restoring their self-confidence through cosmetic work or by relieving their pain in their dental emergencies. Since his graduation from dental school, Dr. Campbell has committed

himself to continuing his education in order to provide the most informed care for his patients. He offers a wide range of specialized services, including gum recession treatment, bone grafting, dental implants, and cosmetic smile makeovers. He has been named a Top Dentist by Naples Illustrated twice so far.

Born on Long Island and raised in Southwest Ranches, Florida, Dr. Campbell now calls Naples home. He finds it to be a friendly place where you can find compassionate people who take pride in their community. Seeing neighbors help each other in the aftermath of Hurricane Ian left him with an even greater sense of pride.

Dr. Campbell shares his passion for dentistry with his wife, Alissa, who is one of our dental hygienists. They have two cats in addition to their two energetic boys who enjoy swimming and playing basketball and baseball. When not in the office, Dr. Campbell loves to work out, travel with his family, and barbecue.

Charity Corner

The "Do the Right Thing" Marc Newberry Memorial Scholarship was created to help those students who do the brave and honorable thing in the face of adversity.

As an athlete and scholar, Marc was awarded the key to the city after helping pull dozens of cars from a flooded street in Naples after a heavy storm in October 2014 and pushed them to the Coastland Center mall. Marc passed away in a tragic boat crash at age 20, and his legacy lives on through his scholarship.

If you would like to make a financial donation toward this scholarship, please make all checks payable to, "Marc Newberry Memorial Scholarship Fund" and leave it at the reception desk of the office by April 30, 2025.

Oral health is an essential aspect of overall well-being, affecting not only the appearance of our smile but also our general health. Good oral hygiene practices, such as brushing, flossing, and regular dental check-ups, help prevent a wide range of dental issues, including cavities, gum disease, and tooth loss. These

conditions can cause significant pain, discomfort, and even difficulty eating and speaking, impacting quality of life.

One of the most important reasons to maintain oral health is its link to overall physical health. Poor oral hygiene can lead to the accumulation of harmful bacteria in the mouth, which may enter the bloodstream and contribute to more serious health problems, such as heart disease, stroke, and diabetes.

Research has also shown that gum disease is associated with an increased risk of complications during pregnancy, such as preterm birth or low birth weight.

Maintaining good oral health is relatively simple, involving regular brushing with toothpaste and daily flossing reduces bacteria. It is also crucial to visit the dentist regularly for professional cleanings and routine check-ups. These visits allow for the early detection of dental issues, which can be treated before they develop into more serious, painful and costly problems.

Additionally, a healthy mouth improves self-confidence and social interactions. Fresh breath and a bright smile contribute to a positive first impression and can enhance personal and professional relationships.

Overall, oral health is integral to maintaining general health and well-being. By adopting healthy oral care habits, such as regular brushing, flossing, and

dental visits, individuals can prevent a range of dental issues and protect themselves from potential health risks. Prioritizing oral hygiene is a small but essential investment in a healthier, happier life.

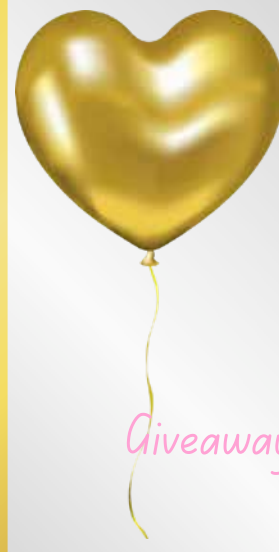

Maintain your overall health by calling (239)206-1507 to schedule your dental appointment today!
